Advanced training: AIAF Financial School launches its Certified International Wealth Management Diploma

AIAF Financial School has taken a further significant step towards the internationalization of its certified training program by signing an exclusive partnership with the **Association of International Wealth Management (AIWM)** to offer the **Diploma of Certified International Wealth Management (CIWM)** in Italy.

The new training program (visit [link](#)), dedicated to those who want to refine their skills in the field of Wealth Management, will be accessible online. This partnership will enable AIAF - the Italian Association for Financial Analysis - to bring the highest international standards in Wealth Management to its participants, whilst taking into account the specific aspects of the Italian context as part of the training program.

*"The signed partnership allows AIAF Financial School to further expand its educational offer, obtaining exclusivity in Italy to promote the CIWM diploma. We believe that in an increasingly challenging market environment, having access to top quality educational courses is an essential requisite for anyone who wants to operate in the field of large portfolio management", says **Alberto Borgia, AIAF's President.***

Andreas Jacobs, AIWM's CEO adds: *"We are delighted with the cooperation with AIAF and bringing an established global standard of the highest quality to Italy. It further strengthens our world-wide network of countries offering the CIWM".*

The Certified International Wealth Manager CIWM® training program ensures an in-depth knowledge of international wealth management and tax planning that reflects the cross-border connections and investment of today's wealth owners, teaches sophisticated techniques to assess a client's overall financial situation and risks, and takes a holistic approach to a customer's financial and personal situation (accounts, tax, cash flow, portfolio, real estate, family etc.) It also focuses on the psychological factors influencing the customer and the advisor (behavioural finance).

For further details on studying the program in Italy, please contact AIAF
